

↘ HIGH SPEED IT CABLING

What is high speed cabling?

High speed cables are used to transmit data where a wireless link is unavailable or unsuitable.

Whether you need to relocate your offices, a complete new network or upgrade an existing cabling system, we can help.

Our cabling engineers have the knowledge and experience to get you **connected as quickly as possible** with minimum disruption to your business.

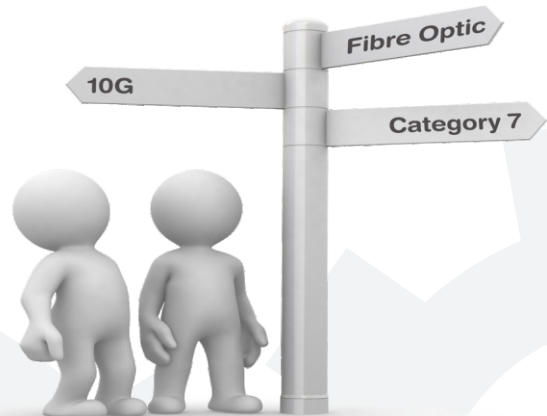

Minimise data traffic issues with professional structured cabling from Adept Systems

We've been installing **IT cabling** for network infrastructures since the early days of RS232, Twinax, 10Base-2 (Thinwire) and 10Base5 (Thickwire) right up to today's standards, including **Cat 6, Cat 6a, Cat 7, 10G, fibre optics (OM1, OM2, OM3, OS1)** and **voice**.

Test your infrastructure performance...

For any sized IT infrastructure well planned **IT cabling** is a must to ensure **future support and scalability**.

Plans, test results and health and safety documentation are provided. We offer **audits to assess the performance** of your existing network cabling.

KEY BENEFITS:

- ✓ **Complete service** from site survey to installation
- ✓ Our systems outlive all other networking components with **minimal (if any) upgrades**
- ✓ **Single integrated cabling system** for all voice, data, video, control and other systems
- ✓ Properties equipped with **high speed digital infrastructures** are more commercially desirable
- ✓ **Centralised administration** for the control, isolation and repair of controllers, hubs and end devices

Commercial & education solutions:

Whether you're a **commercial** or **educational** organisation we can equip your premises with a **complete structured cabling solution**.

Reduce data traffic issues and easily **manage your infrastructure**.
