

What is a **PBX**?

A **Private Branch Exchange (PBX)** is a telephone exchange to serve a particular business or office, as opposed to using a common carrier serving the general public.

Our PBX solutions offer extensive features to enable intelligent call handling.

PBXs make connections among the internal telephones of a private organisation, as well as the outside telephone network.

Digital and analogue options...

Modern **PBXs** use all-digital methods for switching and can handle **digital equipment** as well as **analogue telephones**.

Our systems also work with **regular telephone sets** and **IP phones**, further reducing your initial costs.

Easily add an extension by adding a SIP phone and configuring in the PABX.

A fully integrated **DECT cordless solution** is provided with each **PBX**. We supply a wide range of compatible **digital and analogue handsets**.

Receive your calls wherever you are...

With **inbound call distribution** and **diversions to external numbers** (mobile, home etc.) you'll always be contactable.

Complete IT integration...

Improve communication across your business. Dial straight from **Microsoft Outlook** or any **DDE** enabled application. **Microsoft Exchange Server** is also integrated to **manage e-mail**.

PBX KEY FEATURES:

- ✓ **Central switchboard**
- ✓ **Direct dialling** to each extension
- ✓ **Digital lines** or **SIP trunks** to reduce costs
- ✓ **Dial from Microsoft Outlook** or other **DDE** compatible software. Integrates with **Microsoft Exchange Server**.
- ✓ Screen based **management console** and **call centre software**
- ✓ **Voice over IP (VoIP)** for remote workers
- ✓ Fully integrated **DECT cordless** solution, full range of **digital and analogue handsets** available
- ✓ **Free voicemail** and **e-mail alerts**
